

Seasons Greetings

Make a New Years resolution for 2007. Learn how RemotePrinter can increase your production print volume and enhance customer loyalty by enabling print requests to be easily submitted directly over network and internet connections.

RemotePrinter saves both your customers and Print Room staff valuable time by providing automatic PDF conversion, easily customisable electronic Job Tickets, customer updates, on demand reports and much more.

"I first heard about the RemotePrinter at the University Suppliers Exhibition and started using it straight away. It's very simple and straightforward to use and here at the Careers Centre we've found that it's reduced the turn-around time for our regular publications.

Everything we send to Reprographics now is done via RemotePrinter because it's so easy and efficient. I'd definitely recommend other departments to switch to using the service."

Emma Smith - Careers Centre (University of Brighton)

Ever needed to quickly locate customer documents for reprint?

The New **RemotePrinter Locator** enables you to do just that by applying a powerful document search facility to RemotePrinter Server.

Locate archived documents quickly and easily.

- Save time
- No need for customer to resend documents
- Simplifies valuable repeat orders
- Powerful search criteria

Find it when you need it

Available as a simple plug in extension to your existing RemotePrinter Server, Locator offers a wide range of

search criteria for quickly locating customer documents.

The RemotePrinter way-

- If it's easy to use it will be used
- When it's used volumes increase
- When volumes grow productivity improves
- When productivity improves revenues grow

All the customer need provide is a detail of the original job request for it to be recovered in seconds.

Search criteria includes;

- Document Name
- Job Reference number
- Sequential Job Number
- Customer name
- Email address
- Date received Date required

Advanced search facility

An Advanced facility allows a search of multiple RemotePrinter Job Ticket fields, enabling the most elusive of documents to be tracked down quickly and easily.

Preview selected documents either as thumbnails or in Adobe Acrobat for immediate imposition.

Availability

Available now as a plug-in to RemotePrinter Server.

Contact:

sales@eprint-direct.com for an on-line demonstration.

Locator will save you hours retrieving past documents and provide a valuable service to your customers.

Further enhance RemotePrinter Server Add additional value to your customer documents

Quite Imposing Plus:

Creating booklets or arranging complex imposition layouts has never been easier. Quick to learn and easy to use, our imposition products give immediate results without need for expensive training or complicated job set ups.

Quite Revealing:

Finds and fixes problem elements within a PDF document. Extremely easy to use, designed for pre-press and digital print professionals.

Reveal information that is otherwise difficult to find about a PDF document, such as which fonts are used, transparency, overprinting and more. Fix some of the more awkward problems that can arise - like differently named spot plates, unwelcome transfer functions, or ICC profiles that don't belong.
