

SKYLINE IS A COMPREHENSIVE PRINT DIRECTION, WEB-TO-PRINT AND PUBLISHING SOLUTION.

## EXTEND YOUR HORIZONS WITH SKYLINE PUBLISH

**Skyline is an online Web-to-Print service** that offers an easy, fast and accessible way for users to submit print jobs from multiple sites via a range of devices. The Skyline Storefront allows users to easily upload or search for print products, choose from defined print options and ensures orders arrive at the print room as print ready PDF's with clear instructions. The Web-to-Print system provides the means to both transform the user's experience and to process orders in a timely fashion.

**You can extend your package to include Skyline Publish**, which supports advanced document personalisation allowing the Print Room to greatly expand their offering of services and products, becoming the destination for all things print.

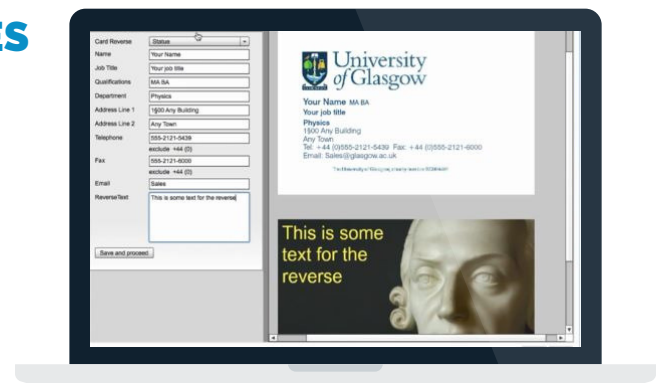

Skyline Publish is a dynamic document creator. This means the Print Room is able to offer a selection of templates which the user is able to modify and personalise. The Print Room has full control of the choice of editable features it offers the users within these templates.

## INVEST IN YOUR DIGITAL CAPABILITIES CREATE:

- Business Cards
- Reports
- Publications
- Invitations
- Booklets
- Mailings
- Brochures
